

# Gold Bulletin

## Website Statistics

The Gold Bulletin journal continues to grow in popularity judging by the latest website statistics. During 2006, the average number of downloaded pdf documents was 9500 per month, a 40% increase compared to 2005. Even more impressive was that in January 2007 an amazing 16,000 pdf files were downloaded! Further analysis of the website's download statistics reveals that certain older papers in the archive are extremely popular, including the works of Fricker, Bond, Hutchings, Hashmi, Haruta, Schmidbaur and Tukevich to name but a few!

You can instantly download these and other 'classic' Gold Bulletin papers from the archive. In 2007 we are planning another major enhancement to the website which will further improve access to Gold Bulletin's extensive archive of gold-related papers. This will allow the back-issue archive to be browsed by subject matter. So, for example, those of you wishing to access all Gold Bulletin papers relating to 'Electronics' or 'Nanotechnology' will be able to do so with just a click of the mouse!

If you have any other suggestions concerning the [www.goldbulletin.org](http://www.goldbulletin.org) website please contact us, email [editor@goldbulletin.org](mailto:editor@goldbulletin.org)
